[Portfolio](#)

## Profile

Analytically driven ICT undergraduate with hands-on experience in data analysis, visualization, and reporting using Python, SQL, MS Excel, and PowerBI. Proficient in transforming raw datasets into actionable insights through structured querying, interactive dashboards, and Python libraries including Pandas, NumPy, Matplotlib, and Seaborn. Strong foundation in relational databases (MySQL, PostgreSQL), certified in Data Analytics, and adept at communicating findings clearly while delivering data-driven solutions in collaborative, fast-paced environments.

## Education

### Adani University – Faculty of Engineering Science and Technology

2023 – 2027

B.Tech in Information and Communication Technology (7th Semester), CGPA: 7.83

Ahmedabad, Gujarat

### The Imperial Science School

2021 – 2023

Higher Secondary Certificate (HSC): 90.73 PR

Dhoraji, Gujarat

- GUJCET: 91.24 PR
- JEE Main: 85.88 PR

### Shree Sardar Patel Vidya Mandir (Patel Boarding)

2018 – 2021

Secondary School Certificate (SSC - 10th), 95.96 PR

Rajkot, Gujarat

## Internships

### Northstar

Feb 2026 - Present

Software Engineer Intern

Onsite, Ahmedabad, Gujarat

- **Engineered** an **AI-powered Shopify Code Generator** using **RAG (Retrieval-Augmented Generation)**, image input, and full admin configuration, automating the generation of production-ready Shopify code from UI screenshots and significantly reducing manual development effort.
- Worked extensively with Shopify themes, metafields, and platform customization workflows, gaining hands-on experience in e-commerce storefront development and management.
- **Designed and developed** highly interactive, responsive, and visually engaging web applications, building modern UI/UX components with a focus on usability, accessibility, seamless user experiences, cross-device compatibility, and frontend performance optimization to deliver fast and scalable web experiences.

### ShadowFox

December 2025

Full-Stack Web Developer Intern

Remote

- Completed a structured project-based internship focused on end-to-end full-stack web development.
- Built responsive frontend interfaces and integrated backend logic following real-world development workflows and best practices.

### ShadowFox

December 2025

Python Developer Intern

Remote

- Completed a structured project-based Python internship focused on core programming fundamentals.
- Developed a **Web Scraper** to extract structured data such as titles, links, and images from websites.
- Built a terminal-based **Hangman Game** using loops, conditional logic, functions, and user input handling.

## Technical Skills

**Data Analysis & BI:** MS Excel, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, PowerBI

**Databases & SQL:** MySQL, PostgreSQL

**Programming Languages:** Python, Java, C

**Frontend:** HTML, CSS, JavaScript, Tailwind CSS, React, XML

**Backend:** FastAPI, REST APIs, PHP

**Computer Science Fundamentals:** DSA, ADA, OS, DCCN, OOPS (Java), DBMS, ML

**Tools & Platforms:** Git, GitHub, PowerBI Jupyter Notebook, Google Colab, Jira, Vercel, Supabase, WEKA, AutoCAD, Matlab, Cisco Packet Tracer, Shopify, Google Stitch

**Soft Skills:** Analytical Problem-Solving, Data-Driven Decision Making, Communication, Agile Learning, Ownership Mindset, Adaptability, Time Management, Team Leadership

## Projects

---

### RMDU Mobiles – Smartphone Recommendation Platform | *React, Tailwind CSS, FastAPI, PostgreSQL* **2026-Present**

- Developed an end-to-end smartphone recommendation platform to solve real customer confusion in selecting the right device based on budget and usage needs.
- Designed and built the complete product interface independently with a strong focus on modern UI/UX, intuitive navigation, and engaging user experience.
- Planned platform structure and organized smartphones into five user-focused categories including budget, gaming, camera, battery, and best overall options for faster decision-making.
- Implemented budget-based filtering, detailed product pages, and side-by-side device comparison to improve user evaluation and purchase decisions.
- Managed the full project lifecycle from concept, feature planning, design, development, testing, to deployment while ensuring performance, scalability, and continuous improvements.

### Cafe Management System (Odoo × Adani Hackathon '26) | *MERN Stack*

**January 2026**

- **Built** a comprehensive restaurant point-of-sale (POS) system during a 24-hour hackathon, streamlining operations across customers, cashiers, kitchen staff, and administrators through a unified digital workflow.
- **Led** project planning, team coordination, and solution architecture by defining application flow, user journeys, module ownership, and execution strategy to ensure timely delivery under strict deadlines.
- **Designed** and developed the complete frontend experience with a modern UI/UX approach, focusing on intuitive navigation, smooth user flows, visually engaging interfaces, and operational efficiency.
- **Implemented** core customer-facing features including table selection, menu browsing, cart management, order placement, and real-time order tracking to improve ordering efficiency and user experience.
- **Developed** cashier, kitchen, and administrative workflows supporting billing, payment processing, live order status updates, menu management, reporting, and day-to-day operational control.
- **Managed** feature prioritization, event handling logic, testing, and final product integration, successfully delivering a fully functional solution and presenting it within the hackathon timeframe.

### J.A.R.V.I.S. – AI Voice-Activated Desktop Automation Assistant | *React, Tailwind CSS, FastAPI*

**2025**

- **Built** J.A.R.V.I.S., an AI-powered voice-controlled desktop automation assistant capable of executing system-level operations including application launching, website navigation, file and folder management, music playback, system monitoring, search automation, and productivity tasks through natural voice commands.
- **Developed** a centralized web-based management dashboard using React and FastAPI to monitor, configure, and control assistant functionalities, providing a unified interface for real-time interaction and system management.
- **Implemented** speech recognition, wake-word detection, text-to-speech, multilingual support, and intelligent command processing to automate tasks such as file search, folder creation, PDF reading, screenshot capture, alarm management, IP discovery, and system controls including volume, brightness, shutdown, and restart operations.

## Achievements

---

- Finalist among **1,500+** registrations in **Odoo × Adani University Hackathon '26**; led team execution and final solution delivery.
- Finalist among **3,500+** participants in **HackOut'25** at DA-IICT, Gandhinagar.
- Led team through ideation, development, and final presentation under a competitive environment.

## Certifications

---

- **30-Day Data Analytics Master Class** – NoviTech R&D Pvt. Ltd. [Credentials](#)
- **Agile with Atlassian Jira** – Atlassian (via Coursera) [Credentials](#)
- **Python Programming** – Reliance Foundation Skilling Academy / Skill India [Credentials](#)
- **Odoo × Adani University Hackathon '26 Participation** [Credentials](#)
- **HackOut'25 Participation** – DA-IICT, Gandhinagar [Credentials](#)
